Standard Specification

Better By Design

Secure, warm canteen facilities, equipped with all the necessary amenities for a functional and comfortable breakroom.

Features like heavy-duty flooring keep staff safe in an environment prone to spills & high footfall ensuring the building is practical and fit for purpose.

Our units are all fully welded to support our anti-vandal specification, ensuring that the products are robust and secure. All units have the option to be linked with other units from our range for complete site solutions.

Features like heavy-duty flooring keep staff safe in an environment prone to spills & high footfall ensuring the building is practical and fit for purpose.
